

Viewing Modules on iPads

If you are accessing this module via an iPad, you may need to download and install the Articulate Mobile Player app on your device in order to view interactive elements. The Articulate Mobile Player app is a free download from the iTunes App Store and allows you to view any interactions included in the module. If you see the following message in your module, please follow the instructions for downloading the Articulate Mobile Player App (see image to the right).

Installing the Articulate Mobile Player App

1. Go to the [Articulate Mobile Player app](#) page or click the **download** link when prompted on the module page.
2. Click **Install**. (Enter your password if prompted.)
3. Click the Home button on your iPad to return to your home screen.
4. Re-open Safari to return to the module.

Note: You will only need to complete this process once. If you have already downloaded the Articulate Mobile Player app, follow the directions below for viewing interactions.

Viewing Interactions with the Articulate Mobile Player App

A Launch button in the module indicates that there is an interaction.

1. Click the **Launch** button.
2. You will be taken to the Articulate Mobile Player app and the interaction will appear on your screen. Complete the interaction.
3. Once finished, click the Home button on your iPad.
4. Re-open the Safari app to return to the module.

Note: Repeat these steps whenever you see a Launch button.
