

Intuitive Feelers: Friendly Environment

These learners are most comfortable in an environment that is interactive, friendly, and social. There should be plenty of room for personal expression and creativity. They prefer an unstructured and relaxed environment. Democratic relationships are the norm for these people. They do their best work in an environment that values compassion and understanding.

Intuitive Thinkers: Experimental Environment

These learners prefer an unstructured and creative environment where they can work alone and on challenging tasks. Their ideal environment is a scientific-type setting in which problem solving and discovery are prevalent. Opportunities for experimentation, a good debate, and brainstorming possibilities are important.

Sensing Judgers: Orderly Environment

A structured environment where everything is ordered, safe, and secure appeals to these learners. Rules, procedures, routines, and time management are all important aspects in their ideal environment. They value a schedule, the status quo, and like things to stay the same. They approach problems in a realistic way.

Sensing Perceivers: Divergent Environment

These learners love challenge and are good in a crisis because they can be very resourceful. As multitaskers, their ideal environment is unstructured, dynamic, and varied. They approach situations and problems in a practical way and are self-starters who do not want supervision or to be controlled. The environment should provide opportunities for individual accomplishments.
